UNIVERSITÀ DI SIENA 1240

DIPARTIMENTO DI INGEGNERIA DELL'INFORMAZIONE E SCIENZE MATEMATICHE — DIISM

Admission Requirements

Applied Mathematics (LM-40)

(effective from Academic Year 2023/24)

Programme website: **https://applied-mathematics.unisi.it/it**

For foreign students, the assessment of the curricular requirements is entrusted to the Teaching Committee, which verifies in particular:

- A background in mathematics, statistics, and physics equivalent to that obtained in a first-level (Bachelor's) mathematics degree.
- Basic principles of computer science and introductory programming skills.

The procedure requires the submission of the application for admission online via the University's Apply online site.

After the Evaluation

You will be notified of the outcome approximately one month after the application deadline, or earlier.

At the discretion of the Enrolment Committee, students who pass the initial selection based on the submitted documents may be invited to take a remote online test and/or attend an interview. The dates for any additional selection tests will be communicated via email.

This assessment must verify knowledge of the English language at a level of at least B2 of the Common European Framework of Reference for Languages of the Council of Europe.

The entry qualification documents are accepted in the following languages: English / Italian.

Schools and universities usually provide documentation translated into English. If this is not available, an official translation will be required, along with certification of the authenticity of the original documents.

Students who are about to graduate and who submit a pre-enrolment request for the Master's Degree are also admitted to the admission test.
