Guidelines for earning 3 CFU “Other knowledge and skills useful for integration into the professional world”

The Teaching Committee of the Master's Degree Program in Applied Mathematics resolves that the 3 ECTS credits corresponding to “Other knowledge and skills useful for integration into the professional world” may be earned through one of the following activities:

- Attendance of elective courses on subjects consistent with the educational objectives of the degree programme, recognised as seminar activities, for a minimum of 24 hours;
- Attendance of doctoral-level courses, subject to the approval of the instructor responsible for the course, recognised as seminar activities;
- Internships or traineeships undertaken within companies, departmental laboratories, or educational institutions;
- Participation in documented educational or school projects;
- Attendance of Italian language courses (for international students only);
- Tutoring or mentoring activities carried out within non-profit organisations;
- Participation in summer schools relevant to the educational objectives of the degree programme;
- Service as a student representative on the Teaching Committee for a period of at least fifteen months.

Students are required to obtain prior approval from the Teaching Committee before undertaking any activity intended to fulfil this requirement.

Siena, 10th October 2025
